

TINGER ARMOR

CONQUERING NEW HEIGHTS

STEP INTO THE UNKNOWN WITH TINGER

Presenting Tinger Armor – a versatile wheeled ATV that ignores the terrain. It can substitute for several vehicles: a snowmobile, a swamp buggy, a quad, even a boat and a tractor. A 5-in-1 vehicle!

This ATV is confident on any terrain, even the most extreme one, while maintaining comfort and ease of use. And it does that in style.

You can choose from a variety of options and engines to match your desires and requirements.

**CAN COPE WITH
ANY TERRAIN**

EXEMPLARY RELIABILITY

The mere fact that our ATVs are made in Russia is a sound argument for reliability. There is no other place with such harsh and diverse climate and that means every ATV has to be built like a tank so that you can rely on it even in the most extreme environment. We know your life can depend on it and we build it with that in mind.

Russia's environment is ideal to test Mars rovers and we take pride in our vehicles as it calls for our engineering team to be at level with NASA. You think Mars is harder than Siberia? We will give Matt Damon our ATV if he grows potatoes there.

IDEAL FOR ANY CLIMATE

MADE IN RUSSIA

HIGH RELIABILITY

**LOW SERVICE AND
MAINTENANCE COSTS**

CONQUER THE ELEMENTS

Why can Tiger Armor go everywhere?

- Low-pressure wheels consist of steel rims and tires with aggressive tread lugs with an option to install tracks
- Body is made with extra-strong HDPE plastic. This lightweight, durable, and safe material is only 10mm thick and retains its properties in any temperatures.

As hard as steel but with no corrosion. The material has high impact elasticity – the body will not fracture and can not be shattered no matter what. These properties ensure low ground pressure for the ATV to cruise smoothly over swamp lands.

YESTERDAY'S RIVER BARRIER IS TODAY'S WATERWAY

There is no place Tinger W8 cannot go. Even rivers are no longer obstacles. Yes, this ATV is not afraid of the water – it will power through any river or lake. If desired, it can be equipped with an optional outboard motor. Combine that with a top frame and removable top and you got yourself a cosy yacht for the most comfortable fishing experience.

For maximum convenience use a trailer to act as an extra flotation device with up to 300 kilos load capacity. The trailer can be further equipped with top frame and removable top for extra capabilities – cargo transportation, additional room for your companions or simply more space for your cargo.

RECREATION AND CHORES IN COMFORT

Tinger Armor is versatile and reliable for family recreation or other group trips. It accommodates a company of 6 on land/4 on water and its 38-litre fuel tank allows for 8 hour of continuous operation.

Wheel-mounted high traction heavy-duty tracks allow the ATV to easily navigate snow-covered terrain.

Winter is not all fun and invigorating recreation – it is also an endless fight with snow. A tedious and annoying chore as all of you know. A Tinger equipped with an optional snow plow makes it a breeze. Any member of your family can do it now and you will even see your kids fighting over their turn to remove snow.

UNLEASH YOUR POTENTIAL

What makes Tinger W8 a strong player on the ATV market is reliability, versatility and off-road capabilities, coupled with other important features such as:

- an exceptionally smooth ride;
- comfortable seats for longer trips;
- a simple and intuitive vehicle control system that requires a minute of getting used to;

- a stylish body;
- low fuel consumption engine that will start in any weather.

Tinger Armor is an ideal solution for any task, recreation or field trips.

VARIANTS

A big part of our operation is customer feedback, we listen and fulfil their requests which results in a large range of accessories and makes our ATVs unique. A winch, a snow plow, rubber tracks,

an autonomous cabin heater, additional light sources, power sockets, tools and many more to suit your particular needs. A cost-effective solution that allows you to configure a vehicle to your requirements.
